

SAFDAR REHMAN

Junior Full-Stack Developer | Junior MERN Stack Developer | React · Next.js

Peshawar, Khyber Pakhtunkhwa, Pakistan • [linkedin.com/in/safdar-rehman-910440247](https://www.linkedin.com/in/safdar-rehman-910440247) • github.com/safdarrehman1

PROFESSIONAL SUMMARY

Junior full-stack developer with 4+ years of hands-on experience building production web applications with React.js and Next.js, and a growing backend practice in Node.js, Express, MySQL (Sequelize), MongoDB and Supabase. Has delivered admin panels, landing pages, e-commerce frontends and complete client websites across fintech, healthcare, logistics, e-commerce and AI-driven products. Currently focused on AI Engineering, studying generative AI and LLM fundamentals and building Python-based AI tools, with the aim of integrating AI features into full-stack products. BS Software Engineering graduate (2026).

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python (learning)

Frontend: React.js, Next.js, Tailwind CSS, ShadCN UI, Ant Design, Material UI (MUI), React Native (Expo)

Backend & Databases: Node.js, Express.js, REST APIs, Socket.io, Supabase, MongoDB (Mongoose), MySQL (Sequelize)

State & Data Fetching: Redux Toolkit, Context API, Zustand, React Query

Tools & Deployment: Git, GitHub, Postman, Vercel, Firebase Hosting, Railway, Hostinger, DNS & server migration

AI Engineering (Learning): Generative AI & LLM fundamentals, prompt engineering, tokenization, AI-assisted features in web apps

PROFESSIONAL EXPERIENCE

Junior Web Developer | Culyte Software House, Peshawar

Late 2024 – Present

- **Frontend delivery:** Build and maintain the frontends of client products in React.js and Next.js, including the HealthCheck questionnaire flow and the driver and payment sections of Peela.
- **Full-stack projects:** Own complete admin panels and landing pages for ThinkLawn, Peela, Laka and Let's Play, and the Culyte company website, from UI through API integration to deployment.
- **Backend development:** Contribute to Node.js and Express APIs with Sequelize and MySQL (ThinkLawn, Peela) and to a Supabase backend (Let's Play), covering data models, endpoints and admin-facing logic.
- **UI engineering:** Build reusable, responsive components with Tailwind CSS, ShadCN UI, Ant Design and MUI, and manage app and server state with Zustand, React Query, Redux Toolkit or Context API as each project requires.
- **Collaboration:** Work directly with the CEO and CTO on project structure, coding standards and documentation.
- **Deployment & operations:** Handle hosting, DNS, server migrations and staging environments for client sites on Vercel, Firebase Hosting and Hostinger.

React & Next.js Developer | ORK Technologies

7+ months

- Developed responsive, accessible React.js and Next.js features from design files using Tailwind CSS.
- Integrated REST APIs, including authentication flows and error handling, and agreed API contracts with backend developers up front to reduce rework.

Frontend / React Developer | Tech Track

~1.7 years

- Built component-based React.js applications for multiple clients, with reusable layouts that kept design consistent across products.
- Managed local and server state with Zustand and React Query, reducing redundant API calls, and integrated REST APIs for authentication and data fetching.
- Improved performance through code splitting, lazy loading and fewer re-renders; fixed cross-browser issues.
- Worked with designers and backend developers to turn mockups into working interfaces, and took part in code reviews.

PROJECTS

Intelligent Hiring & Skills Gap Analysis — AI-based hiring platform (Final Year Project)

- **Role:** Full-stack developer (web, admin, mobile and backend, fully completed). AI-powered hiring platform with resume screening, skill-gap analysis and auto-generated candidate assessments, real-time chat via Socket.io, and role-based sign-up for companies, employees and freelancers.

Tech: Next.js, React.js, React Native (Expo), TypeScript, Node.js, Express, MongoDB, Socket.io

ThinkLawn — AI-powered lawn care and soil-test interpretation platform

- **Role:** Frontend lead (admin panel and landing page, fully completed) and backend contributor. Built the admin panel for managing users and lawn-analysis data and the marketing landing page, and developed part of the Node.js API behind them.

Tech: React.js, Next.js, TypeScript, Tailwind CSS, MUI, ShadCN UI, Node.js, Express, Sequelize, MySQL

Links: Landing: thinklawn.com/ • Admin: admin.thinklawn.com/

Peela — Service platform with driver and payment management

- **Role:** Frontend lead (admin panel and landing page, fully completed) and backend contributor. Delivered the admin portal for driver and payment workflows and the public landing page, and contributed to the backend APIs.

Tech: React.js, Tailwind CSS, Ant Design, Node.js, Express, Sequelize, MySQL

Links: Platform: peela.net/ • Admin: admin-panel.peela.net/

Let's Play — Admin panel on a Supabase backend (In development)

- **Role:** Admin panel developer (completed) and backend contributor. Built the admin panel and worked on the Supabase backend (database, authentication and APIs). The wider product is still in its development phase.

Tech: Supabase, TypeScript, Vercel

Links: Live: joinletsplay.vercel.app/

Chedmed — E-commerce website and admin panel

- **Role:** Frontend developer (fully completed). Built the frontend of both the customer-facing store and the admin panel, including product and order management views.

Tech: React.js, Tailwind CSS

Links: Store: chedmed.online/ • Admin: chedmed.online/admin/

Laka — Kids' lunch meal-plan platform

- **Role:** Frontend developer (fully completed). Built the admin panel and the landing page.

Tech: Next.js, React.js, TypeScript, Tailwind CSS, ShadCN UI

Mirza Grease Trap — Canadian client website

- **Role:** Developer (fully completed). Designed and built the responsive static website for a grease-trap service business in Canada.

Tech: Next.js, Tailwind CSS, ShadCN UI

Links: Live: mirzagreasetrap.com/

Culyte Official Website — Company website

- **Role:** Developer (fully completed). Built and launched the official website of Culyte Software House.

Tech: Next.js, TypeScript

Links: Live: culyte.com/

FinTech Pay — Digital wallet and crypto trading platform

- **Role:** Full-stack developer. Built the admin panel, landing page and backend covering wallet balances, crypto trade execution, transaction history, reports and user management.

Tech: React.js, Next.js, TypeScript, Node.js, Express, Sequelize, MySQL

AI Video Highlight Extractor — Personal AI project (in progress)

- **Role:** Sole developer. Python tool with a Streamlit interface that detects and scores the best scenes in movie clips using motion and audio analysis, then exports them as separate clips.

Tech: Python, Streamlit, OpenCV, PySceneDetect, Librosa, FFmpeg

EDUCATION

B.S. Computer Software Engineering

2022 – 2026

Sarhad University of Science and Information Technology, Peshawar, Pakistan • Completed 28 August 2026

LANGUAGES

English – Fluent • Urdu – Fluent • Pashto – Native
